*The Carotid Restraint Training Institute (Hosted by the Riverside County Sheriff's Department)* is proud to present this professional two-day Carotid Restraint Control Hold instructor course. The Law Enforcement Carotid Restraint Control Hold is a Bilateral Vascular Restraint and is NOT a respiratory "choke hold." This course is designed and instructed by sworn and retired veteran law enforcement trainers to create competent and expert bilateral vascular restraint instructors at the agency level. The CRTI curriculum is based on recent bilateral neck restraint studies and publications by Dr. J. Mitchell, Ph.D. (2011), Dr. J. Pi, M.D. (2010), and recommendations as outlined in the (2007) "National Study on Neck Restraints in Policing" by the Canadian Police Research Centre (Dr. C. Hall, M.D.). This program is also fully endorsed by Dr. Ron Martinelli, Ph.D. who is a nationally recognized Forensic Criminologist specializing in police use-of-force. Attendees successfully completing this course will be certified as a Carotid Restraint Control Hold Instructor by this insured training presenter for a period of three years.

**Topics Covered:** This course was designed to meet or exceed law enforcement and state P.O.S.T. training standards. Course topics include: Neck restraint history, types of neck restraints, objectives and goals, medical opinions, case law, anatomy and physiology, effects on the body, risk factors, post application side effects and care, follow-up actions, excited delirium, technique development, recognizing submission, defense against neck restraints, instructor development and more.

**Prerequisites:** None. This Carotid Restraint Control Hold Instructor course is for new or current DT instructors.

**Requirements:** Students must active Peace Officers, Correctional Officers, Probation/Parole Officers or a civilian law enforcement trainer employed by a federal, local or state agency, or certified training center. Students must be in good physical condition, free from any pre-existing injuries or conditions that may become aggravated with dynamic and repetitive defensive tactics type training. Students will **NOT** be intentionally rendered unconscious during any portion of this course. Students must pass a written and physical performance examination to receive instructor certification.

**Suggested Items:** Loose fitting athletic or duty attire is required (no shorts or tank tops). BDU style pants and mat room shoes are recommended (No outdoor shoes or boots on the mats. Socks are okay). An empty duty belt with keepers, handcuffs and a handcuff key is also required. Red or blue training guns are acceptable.

Students will receive an electronic or hardcopy Technique Manual, PowerPoint presentation, Carotid Restraint Resources, Instructor Certificate & Challenge Coin upon successful completion.

**Venue Information:** Sergeant Andy Stonebreaker (951) 486-2794, [astonebr@riversidesheriff.org](mailto:astonebr@riversidesheriff.org)

Mail check and this completed registration form to:

Boydd Products, Inc.  
19510 Van Buren Blvd, F3-259  
Riverside Ca. 92508

## COURSE TESTIMONIALS

"Outstanding, thank you! Complete program that covered all areas associated with the CRCH to deal with possible risk management concerns. I am generally critical of training and this course is simply great." T.S. Norfolk PD, VA

"I really learned from this course. Being a small female in law enforcement I was able to see these techniques actually work on men twice my size." V.R. Bakersfield PD, CA

"Outstanding instruction. One of the most well instructed courses I have attended in 20 years of law enforcement." K.H. Vacaville PD, CA

"Excellent use of applied technique backed with solid research and training. I loved it." S.G. Story County Sheriff, NV

"Excellent! This class filled a void in our training. We have used another neck restraint technique but consider it obsolete with the popularity of MMA. Honestly the best DT class I have taken. Looking forward to passing this training on to our Troopers." B.G. Kansas Highway Patrol, KS

"This class has the potential to save lives of both the officers and suspects. The level of skill and knowledge of the instructors is the best I have had in 16 years of LE experience." A.L. Vacaville PD, CA

"That was some of the best training I have ever attended. I am glad to see someone has taken the initiative to bring back these holds/restraints and stressed the importance of them in the law enforcement community. The training was what I expected. I was fully engaged mentally and physically." P.P. Kansas Highway Patrol, KS

"I thought I knew about the vascular neck restraint, but after this course I realized that I only knew about 5% of what was taught here. This is an outstanding class and I believe every single officer in the USA should learn this." G.T. West Palm Beach PD, FL

"This was a good and objective class that definitely broadened my knowledge of the CRCH. This will enable me to be an effective instructor. The medical information was a must!" R.C. Virginia Beach PD, VA

"This was my first neck restraint class. The material offered was valuable to me and I am excited to be able to present this to my agency. Thanks." P.F. Okeechobee County Sheriff, FL

"This was a well taught course on a high liability but highly effective law enforcement tool. Both instructors were dedicated to helping students succeed and effectively teach the Carotid Restraint Control Hold to their own department personnel. I highly recommend all Arrest and Control or Defensive Tactics Instructors attend this course." C.B. Arcadia PD, CA

"Great class. Provided current medical studies as backup for the techniques taught. Class was tailored to Law Enforcement Officers. Provided good control techniques that stand up to civil & criminal liabilities and scrutiny." J.M. Johnson County Sheriff, KS

"I recently attended your instructor class in Olathe, Kansas. Last night I was able to perform the hold and it worked great (intoxicated subject resisting). I used the standard hold and before he was rendered unconscious, he gave up. Just wanted to say thanks for the great training." M.L. ESPD, MO

"Fills a niche where there isn't much other instruction offered. The instructor did a great job researching and documenting relevant data..." C.D. Huntington Beach PD, CA

"Relevance, instructor experience, teaching ability, patience and the variety of applications and escapes were good. Excellent instructor course on an often quickly taught part of defensive tactics. I feel much better equipped to train officers in this valuable law enforcement tool." M.S. Montclair PD, CA

"Fills a hole in current law enforcement training. The course provided materials, knowledge and techniques to support its application. Very effective and well thought out." D.P. Arcadia PD, CA

"This course was safe and met the program objectives. I hope to bring this back to my agency for approval!" R.D. West Palm Beach PD, FL
